Education

Mechanical Engineering
UFPI — Federal University of Piauí
2012–2016

Skills

Languages

TypeScript JavaScript Bash

Frontend

React 19 Next.js
Tailwind CSS

Backend

Node.js REST APIs RBAC
Zod Webhooks

Data & Infra

PostgreSQL Redis Docker
Linux AWS Vercel

Quality & Integrations

Jest GitHub Actions
Mercado Pago/PIX

Languages

Portuguese (native) · English (fluent) · German (intermediate) · Spanish (intermediate)

Summary

Full-stack developer with an engineering background and end-to-end experience on real systems: domain modeling, REST APIs, authentication and authorization, integrations (payments, email, storage), automated testing, CI and deployment. I value simple architecture, separation of concerns and maintainability.

Experience

Full-Stack Developer

Freelance — 2023–present

- Designed and maintain a production supply-chain ERP for a food industry company (orders, production, shipping, inventory, pricing profiles, KPI dashboard), rewriting and evolving the company's previous management system — granular RBAC and layered architecture.
- Built a digital-products e-commerce with PIX checkout (Mercado Pago): HMAC-verified webhooks, event idempotency, automatic email delivery with signed URLs (Cloudflare R2), email verification codes and rate limiting.
- Built an industrial product catalog with a public storefront and admin panel (CRUD, CSV import, image uploads, light/dark theme).
- Automated multi-client PostgreSQL backups with Google Drive uploads, configurable retention and Telegram alerts.
- Practices: integration tests against a real database, versioned migrations, CI with lint and tests, usage documentation.

Next.js TypeScript PostgreSQL Docker Jest
AWS SES Vercel Neon

Engineer

Federal University of Santa Catarina (UFSC) — 2016–present

- Technical and contract management, technical proposal analysis and coordination with multidisciplinary teams.
- Developed digital solutions and automations for internal processes.
